

# SHOAIB ALI Senior Full-Stack Engineer

Doha, Qatar | +974 3031 3046 | shoaibintech@gmail.com | <https://shoaibintech.github.io> | [linkedin.com/in/shoaibintech](https://www.linkedin.com/in/shoaibintech) | QID: 29958616262

## PROFESSIONAL SUMMARY

Product-focused Senior Full-Stack Engineer with 5+ years of experience building, owning, and shipping production systems across backend, frontend, and mobile in fast-moving startup environments. Skilled across the full development lifecycle, with strong engineering foundations in system architecture, API design, performance optimization, and cloud infrastructure, while continuously learning and enhancing technical expertise. Known for taking ownership of architecture decisions through production deployment and solving business problems with practical, scalable, and effective technical solutions.

## SKILLS

**Frontend:** React, React Native, Next.js, TypeScript, Redux, RTK Query, Tailwind CSS, Material UI, Styled Components

**Backend:** Node.js, NestJS, .NET, REST APIs, GraphQL, Redis, SQS, AWS (Lambda, EC2, S3, ECS, CloudWatch, Cognito), Azure

**Data Engineering & AI:** Apache Kafka, Grafana, Open Telemetry, AWS Glue, Redshift, Athena, LangChain, and RAGs

**DevOps and Databases:** CI/CD, GitHub Actions, Docker, Kubernetes, RDS, Oracle DB, MySQL, MongoDB, Query Optimization

**Architecture:** Distributed Systems, Event-Driven Systems, Scalability techniques, Cloud architecture, Performance, Message Queues & Event Streaming, Caching, API Design, Security, and Auth

**Integrations:** Plaid, Stripe, Third-party OAuth, Webhook-based integrations

**Soft Skills:** Communication, Ownership, Problem-solving, Critical Thinking, and Mentoring

**Domain Specific Skills:** E-commerce, Inventory Management Systems, Accounting Systems, and Restaurant Tech.

## CORE QUALIFICATIONS

- Proven ability to own and deliver complex full-stack systems end-to-end (frontend, backend, databases, and cloud), from architecture and design to production deployment across web and mobile platforms.
- Combine hands-on development expertise with architectural thinking, considering scalability, maintainability, and business impact beyond day-to-day implementation.
- Strong cloud architecture expertise across AWS and Azure, with a deep understanding of major AWS services, and the ability to design end-to-end, scalable, and reliable systems.
- Quickly master and deliver across any technology stack through strong software engineering foundations, building end-to-end prototypes and production-grade systems with AI-assisted development workflows to accelerate design, implementation, and validation.
- Effective cross-functional collaborator who aligns technical decisions with business objectives, translating stakeholder needs into shipped features across startup teams and multiple product verticals.

## PROFESSIONAL EXPERIENCE

### AIO Restaurant Platform – Islamabad, Pakistan

**Senior Full-Stack Engineer** | Onsite · Full-Time Mar 2024 to Mar 2026

*All-in-one AI restaurant management ecosystem targeting 10000+ US locations, priced 5 to 10x below competitors.*

- Led system and architecture for a multi-tenant restaurant platform across BE, FE, and third-party integrations.
- Programmed core backend modules, including inventory, accounting, restaurant management app, and analytics using scalable architecture (NestJS, async processing, caching)
- Engineered a React Native app known as “MOM” for restaurant operations, including staff management, reporting, leave management, tasks, and employee document workflows
- Drove performance and scalability improvements (DB optimization, caching, indexing, queues, replication) while collaborating with cross-functional teams

#### Key Achievements:

- Reduced average API response time from 500ms to 100ms, an 80% improvement, enabling the system to scale 10x.

- Saved each restaurant \$1K to \$5K per year by building an in-house accounting module, eliminating third-party tools.
- Removed 5 to 8 hours of manual effort in inventory & employee, and accounting per week through automation.
- Provided live technical support to resolve production issues, implement enhancements, and ensure system stability.

## LetsData.io – Islamabad, Pakistan

### Frontend Engineer | Remote · Contract Jul 2023 to Dec 2023

- Led a full frontend rebuild of the public website using Next.js, with a focus on performance, SEO, and maintainability.
- Designed and implemented a responsive UI system for the marketing site aligned with product positioning.
- Optimized rendering, asset loading, and page structure to improve Core Web Vitals

#### Key Achievements:

- Improved Lighthouse performance scores by 40+ points through Next.js rebuild and targeted frontend optimizations.
- Decreased initial page load time by 80%, improving user experience for a technical audience.

## Esquall Technologies – Rawalpindi, Pakistan

### Full-Stack Developer | Onsite · Full-Time Apr 2022 to May 2023

- Delivered SongOven, a music commerce platform enabling artists to create/sell digital content.
- Developed a credit-scoring platform integrating real-time bureau data and analytics to support lending decisions.
- Contributed to multiple applications across fintech, music, and social domains using React/React Native and Node.js
- Mentored junior engineers on project structure, frontend architecture, and reusable component design practices
- Introduced Onboarding guides, design patterns, and practices ( Atomic Design, SOLID, and DRY principles) across team codebases, reducing onboarding friction.

#### Key Achievements:

- Reduced new engineer onboarding time by standardizing coding practices, documentation, and onboarding guides.
- Deployed 7 team projects as primary engineer, spanning music, fintech, and social platforms.

## Creadios – Rawalpindi, Pakistan

### Junior React & React Native Developer | Onsite · Full-Time Nov 2021 to Apr 2022

- Owned and shipped the Imateam mobile application, enabling players to connect, socialize, manage profiles, and coordinate activities through a social platform.
- Programmed features for goodgrid.us, a digital platform for the US State Department offering prisoners the opportunity to restart their lives.
- Collaborated with backend engineers to translate requirements into production-ready mobile applications

### React & React Native Developer | Internship June 2021 to November 2021

- Learned React and React Native under senior mentorship, applying core concepts while contributing to projects.
- Built responsive UI, integrated REST APIs, and developed reusable components for real-world web and mobile apps.
- Assisted in building, testing, and distributing Android and iOS application releases for production deployment.

## Fiverr - Remote

### Freelance Web Developer | Freelance Nov 2019 to March 2021

- Managed 30+ client projects end-to-end across e-commerce, business, and landing page use cases, handling scoping, development, and delivery with a strong repeat client rate.

## PROJECTS

---

- [Ultrasound.ai](#): AI-powered ultrasound platform for early-stage pregnancy prediction using machine learning.
- [AIO Restaurant Platform](#): All-in-one AI restaurant management ecosystem serving 30+ live restaurant locations.
- [LetsData.io](#): Public-facing product site rebuilt end-to-end in Next.js for improved performance and UX.
- [Imateam](#): Social platform enabling players to connect and collaborate.
- [Healing Trauma](#): Research platform supporting licensed clinicians and researchers studying trauma.

## EDUCATION

---

- **Bachelor of Science in Software Engineering | COMSATS University Islamabad**, Wah Cantt, Pakistan | Sept 2016 to Feb 2021

## CERTIFICATIONS AND LANGUAGES

---

Technical Support Fundamentals | The Bits and Bytes of Computer Networking | IBM Introduction to Cloud Computing  
Developing Cloud Native Applications | Introduction to Data Engineering

**Languages:** English (C2 Proficient, IELTS B2) | Urdu (Native)
